

-9v Inverter

A very compact voltage inverter for use with positive ground effects, being fuzz pedals mainly.
For tight builds, use low profile electrolytic caps (available on the webstore).

Bill of materials

Capacitors		IC
C1	10uf	U1 Charge Pump - I recommend the LT1054 or the low noise TC1044scca. Check the store for the TC1044scca!
C2	100uf	
C3	10uf	Diode
		D1 (next to U1) 1n400x
